

CyberPower

POINT OF SALE POWER PROTECTION

INTRODUCING THE RT650 UPS SYSTEM

The new CyberPower RT650 UPS System provides ideal battery backup and surge protection where space is limited: at register counters, under desks, kiosks, ATMs, and in gaming environments. And every RT650 UPS is covered by a standard **five-year warranty**.

Even the slightest surge or spike in power can disrupt a retail transaction. Battery backup for point of sale (POS) equipment helps keep employees productive, selling efficient, and customer data safe.

The RT650 features a capacity of 650VA/400W and six NEMA 5-15R outlets providing long lasting backup power for a variety of connected equipment in a small mini-tower form factor.

INTRODUCTORY OFFER!

Through September 30, 2016, save on the new RT650 with a \$10 instant rebate.
