B2BGATEWAY NAMED TO CIOREVIEW'S 20 MOST PROMISING LOGISTICS TECH SOLUTION PROVIDERS 2016

July 27, 2016 | Fremont, CA – B2BGateway, a leading global EDI solution provider and Data Integration specialist, announced today that it has been included in the list of "20 Most Promising Logistics Tech Solution Providers 2016" by CIOReview.

"We are happy to announce B2BGateway as one among the 20 Most Promising Logistics Tech Solution Providers 2016," said Jeevan George, Managing Editor of CIOReview. "B2BGateway has a successful proven track record of providing latest technologies for the companies that sets a new foot print in the logistics arena."

B2BGateway is ranked based on the Warehouse Support System (WSS), which combines the best of Web based EDI and fully integrated EDI gives organizations importable Purchase Orders and Printable Pick Tickets in their warehouse. Using the Web interface, warehouse employees can print their own Pick Tickets, confirm shipments, generate Advance Shipping Notifications and print UCC-128 Barcode Labels. The WSS works in conjunction with the fully integrated EDI so orders are still imported into their backend ERP system, (not typed), and Invoices are extracted.

Roger Leyden, Director of Global Business Development at B2BGateway adds "B2BGateway is delighted to be recognized as a 'Top 20 Most Promising Logistics Tech Solution Provider' by our industry peers at CIOReview. Since our foundation in 1999 we have worked hard to provide our clients with leading automated supply chain software that reduces errors, automates process flows and drastically cuts operating costs. B2BGateway's cloud based EDI solutions are ideal for logistics providers working in the new omni-channel environment as they allow full seamless communication and visibility between all parties in the supply chain".

About B2BGateway: Founded in 1999, B2BGateway is a dedicated EDI provider and has been offering cost-effective, easy to use, cloud-based EDI solutions. B2BGateway supports all US and International EDI Mapping formats including ANSI X-12, EDIFACT, Tradacom, Odette, XML, etc. as well as virtually all accepted EDI transport protocols including VAN, AS2, SMTP (E-mail), FTP, HTTP, Secure Socket, etc. For more info, visit: www.b2bgateway.net/
