

PRESS RELEASE – FOR` IMMEDIATE RELEASE

myHealth Sentinel partners with Enovacom to offer Interoperability and Security Software Solutions to Healthcare Industry

Singapore, Aug 5, 2016 – myHealth Sentinel (mHS), an industry-leading Healthcare Connectivity Solutions (HCS) company, is delighted to announce its partnership with Enovacom, a leading software vendor in interoperability and security solutions in healthcare environment, to introduce its suite of advanced software-based solutions into the SE Asia hospital IT marketplace.

Enovacom’s advanced ‘Integration Engine Technology’ – based on its core solution ENOVACOM Suite - enables the secure, seamless sharing of information between new and legacy healthcare IT systems, which is essential to the creation and scaling-up of the extended medical ecosystems, required to meet the soaring demand for long term chronic care.

Enovacom’s interoperability solutions are cost-effective and can be implemented in months rather than years, providing rapid improvements in operating efficiency and ROI. To date, Enovacom’s solutions have been deployed in over 1500 sites in Europe and North America, integrating hundreds of mission-critical healthcare applications.

“mHS is a leader in providing best-of-breed Healthcare Connectivity Solutions”, said Mr. William Chew, Managing Director and co-founder of myHealth Sentinel. “Together with our award-winning solutions encompassing Telehealth, Medical Device Integration & Lab Middleware, the addition of Enovacom’s solutions will offer our growing base of customers, the ability to quickly and economically interconnect their silo’ed systems throughout their expanding IT ecosystem.”

“After Europe and North America, we now are proud to settle in South East Asia partnering with a recognized healthcare player that will help us deploy and support our solutions locally. The combination of both our expertise is a plus for the challenges that the healthcare IT Market has to face daily and we’re confident that the success encountered in other parts of the world should happen soon here too,” emphasizes Laurent Frigara, co-founder and CEO of Enovacom.

About myHealth Sentinel:

mHS is a young and fast-growing Singapore-based HealthTech company focused on providing industry-leading Healthcare Connectivity Solutions (HCS), which interconnect clinicians, patients and IT systems with patient data across the healthcare ecosystem.
