Timberly Sawmills Introduces Edger and Resaw Equipment Line

Indianapolis, IN – [Timberly](http://www.timberly.com), the Indiana-based portable sawmill manufacturer, introduces a new edger and two new resaws to their sawmill equipment line. The addition of the E100 Edger, R100 Resaw, and R200 Resaw bolsters Timberly's affordable product offerings that include portable sawmills, log handling tools, blades, and blade maintenance equipment.

The [Timberly E100 Twin-Blade Edger](#) is an entry-level unit for sawmillers to increase productivity and lumber yield.

Timberly E100 Edger:

- 14HP Gas Engine (10HP 3PH Electric Optional)
- 12" wide by 2" thick cutting capacity
- Two circular blades (one fixed and one adjustable)
- Starting at \$7,295 USD

The Timberly E100 Edger is an affordable solution for sawmillers looking to increase production.

The [Timberly R200 Resaw](#) is engineered for operations that demand continuous production for breaking down boards, cants, and reclaiming slabs. The R200 offers more powerful engine options and a heavier built saw head than the company's new entry-level [R100 Resaw](#).

Timberly Resaws:

- R200 Power Options: 20HP Gas Engine (25HP Gas Optional)
- R100 Power Options: 14HP Gas Engine
- 12" wide by 9" tall cutting capacity
- Adjustable blade guide arm with ceramic guides
- R200 starting at \$6,295 USD
- R100 starting at \$3,995 USD

Timberly Resaws are ideal for breaking down boards, cants and reclaiming slabs. R200 Resaw shown.

"The addition of our new edger and resaws is another step forward in making more affordable equipment available for your lumber processing needs," said Chad Sanders, Timberly Manager. "With Timberly, you don't have to overspend to get quality and easy to operate sawmilling equipment for your wood business or hobby."

The Timberly edger and resaws are available for purchase online. Visit www.timberly.com or call 877.340.5634 to find out why affordable sawing starts with Timberly.

About Timberly Portable Sawmills
