ProShip® Product Suite and CVP-500 to be Showcased at PARCEL Forum
Two innovative solutions will be demonstrated at ProShip Booth #504

Brookfield, Wis., August 16, 2016 – [ProShip, Inc.](#), a Neopost company, today announced both its ProShip® Product Suite and the CVP-500 will be featured at PARCEL Forum, booth #504 from September 12 – 14, 2016.

The ProShip® Product Suite is the fastest, most carrier-compliant shipping software solution in the industry. It integrates seamlessly with host systems and provides a reliable, scalable solution for all shippers. This enterprise-wide, multi-carrier shipping software is fully customizable to fit every business' needs. The software also features a rate shopping program that allows shippers to identify the best parcel carrier and service based on the package's size, desired delivery date and cost.

The CVP-500, a newly released automated packing solution, builds, fills, folds and labels each parcel in one seamless process. This unique system does the work of up to 10 packing stations and can create a parcel every seven seconds. Not only does the CVP-500 speed-up the fulfillment process, but it also creates a fit-to-size package to reduce DIM weight costs and use less packing material. This automated packing solution saves businesses time and money.

ProShip experts will be available at booth #504 to demonstrate the ProShip® Product Suite and CVP-500.

"We are excited to feature the ProShip® Product Suite and the CVP-500 at PARCEL Forum. Businesses will see how these innovative solutions can be a competitive advantage, while also increasing efficiency and reducing costs," says Tim Casey, Executive Vice President and General Manager of ProShip, Inc.
