

Make this year the year of better student behavior, stronger classroom relationships, increased student engagement, and higher levels of thinking and learning.

When it comes to student behavior and achievement, the classroom environment you establish makes all the difference. But what makes successful classrooms truly successful? What do highly effective teachers do to establish a learning environment that promotes positive behavior and supports high levels of learning all year long? All successful classrooms, regardless of content area or grade level, share four common elements:

1. Organization, rules, and procedures
2. Positive relationships
3. Engagement and enjoyment
4. A culture of thinking and learning

Tools for a Successful School Year shows you how to make these “Four Cornerstones” the guiding principles of your classroom. With more than 20 classroom-ready tools to develop these cornerstones, this book gives you the practical techniques you need to make this year your most successful yet—starting on day one.

“Once again, The Thoughtful Classroom team has provided simple tools that open the door for thoughtful work in the classroom. Each of the Four Cornerstones provides a strong foundation for students to participate in challenging work, both individually and collaboratively. The tools in this book enhance and complement so many ways in which students can build the Habits of Mind.”

—Bena Kallick, Co-director, Institute for Habits of Mind

Why Tools?

At Silver Strong & Associates, our goal has always been to help teachers bring the best practices into their classrooms. This goal is founded on a recognition that too often goes unstated: teaching is hard work. That's why we've spent the past forty years working with educators to turn the best educational research into practical techniques that are easy to implement in the classroom. We call these techniques **tools** because they're designed to make the hard work of teaching easier and more effective.
