A JD Edwards EnterpriseOne
solution for Smart Manufacturing.

oneConnect
Enterprise IoT. Simplified.

EOne Infotech's Integrated IoT Solution
## FOR SMART CONNECTED MANUFACTURING

Capitalize on the IoT revolution - **one**Connect - an innovative and customizable end-to-end solution that integrates with existing JD Edwards EnterpriseOne software.

oneConnect delivers a new level of innovation for smart, connected manufacturing.

Innovative Solutions

EOne Infotech's proprietary IoT solution, **one**Connect, effectively connects manufacturing production, processes and people with the ERP architecture to obtain production efficiency, lower operational cost and promote overall business profitability.

oneConnect helps create a highly connected and networked manufacturing process leading to optimization of all production process components (cost, resources and labor), predictive maintenance, capacity requirement planning and seamless integration of machine information with JD Edwards.

oneConnect automatically and seamlessly executes all JDE processes based on sensor data and without human intervention, allowing quick course corrections, real-time data analytics and strategic decision-making.

oneConnect **Architecture - Integrated IoT Solution for JD Edwards**

Automated JD Edwards EnterpriseOne Processes

Machinery   **one**Connect Sensors/Hardware   **one**Connect IoT Cloud   **one**Connect Analytical Dashboards (Combines Real-Time & JDE Data)

With its highly modular design - the possibilities to utilize oneConnect are limitless!
