

FOR IMMEDIATE RELEASE:

**DYNAMICS GP ON AZURE SIMPLIFIED PACKAGING RELEASED BY ROSEASP:  
DYNGPAZURE.COM**

*RoseASP a full-service provider of Microsoft Dynamics Hosting, is now offering Microsoft Dynamics GP on Microsoft Azure with simple pricing options and many commonly installed ISV solutions.*

**SAN DIEGO, Calif. (September 19, 2016)** Microsoft Dynamics GP on Azure deployments have been made simpler, faster and more affordable through RoseASP's release of Dynamics GP on Azure at DYNGPAZURE.com, announced [RoseASP](#) today.

[DYNGPAZURE.com](#) provides quick, easy and cost-effective packages for Dynamics Customers and Partners to quickly implement cloud based Dynamics GP with the power of Microsoft Azure data centers and the reliability of RoseASP's 15-plus-years of experience with Dynamics GP cloud deployments.

"The demand for cloud based accounting software continues to grow, and our goal is to ensure the continued success of Dynamics GP Customers and Partners as the channel changes at an increasingly rapid pace," said Linda Rose, CEO and Founder of RoseASP and visionary behind DYNGPAZURE.com. "DYNGPAZURE.com is an uncomplicated way to quickly launch GP on the Azure cloud without breaking the bank, enabling the flexibility to grow and implement hybrid systems across Azure, Private Cloud and On-premise platforms as business needs change."

DYNGPAZURE.com offers simple preconfigured pricing packages for three-user, five-user and ten-user deployments with additional user licenses available. Optional customization and configuration extras are available as well as integrated ISV applications through the [DYNGPAZURE.com Marketplace](#).

The DYNGPAZURE.com Marketplace provides a robust catalog of GP add-on applications from leading Independent Software Vendors, enabling customers to start cloud-based software trials at no cost and select the software tools they need to make GP work for their business.

**Microsoft Azure Cloud** is an open, flexible cloud infrastructure and an affordable option for businesses looking to quickly launch applications and back up data in the cloud. Dynamics GP on Azure allows for flexible scalable growth with included RoseASP services for backups, user counts, GP modules configuration, monitoring and maintenance.

**Microsoft Dynamics GP** (formerly Great Plains Accounting Software) is Microsoft's scalable solution for growing businesses to power their organizations with greater control, more insight and improved efficiency. Dynamics GP has been a stalwart on-premise accounting system since the 1990's and has been continuously updated to become one of the most agile and scalable cloud solutions available to small and mid-size businesses.
