

FOR IMMEDIATE RELEASE:

**DYNAMICS NAV ON AZURE SIMPLIFIED PACKAGING RELEASED BY ROSEASP:
DYNNAVAZURE.COM**

RoseASP, a provider of premium Microsoft Dynamics Hosting services, is now delivering Microsoft Dynamics NAV on Microsoft Azure with simple pricing options and several frequently installed ISV solutions.

SAN DIEGO, Calif. (September 25, 2016) Microsoft Dynamics NAV on Azure deployments have been made simple, fast and affordable through RoseASP's release of Dynamics NAV on Azure at DYNNAVAZURE.com, announced [RoseASP](#) today.

[DYNNAVAZURE.com](#) provides Dynamics Customers and Partners with quick, easy and cost-effective packages for rapid implementation of cloud based Dynamics NAV, leveraging the power of Microsoft Azure data centers and the reliability of RoseASP's 15-plus-years of experience with Dynamics cloud deployments.

"Recent version releases have made Dynamics NAV a cloud-first application, accelerating the rate of change within the channel and our goal is to ensure the continued success of Dynamics NAV Customers and Partners in the cloud," said Linda Rose, CEO and Founder of RoseASP and visionary behind DYNNAVAZURE.com. "DYNNAVAZURE.com is designed to make NAV on Azure quick to deploy without breaking the bank, enabling businesses to grow effectively with the flexibility to implement hybrid systems across Azure, Private Cloud and On-premise platforms as their needs change."

DYNNAVAZURE.com offers simple preconfigured pricing packages for three-user, five-user and ten-user deployments with additional user licenses available. Optional customization and configuration extras are available as well as integrated ISV applications through the [DYNNAVAZURE.com Marketplace](#).

The DYNNAVAZURE.com Marketplace provides a wide array of add-on applications from leading Independent Software Vendors. The marketplace gives customers the option to start cloud-based software trials at no cost to help them select the software tools they need to optimize NAV functionality for their exact business needs.

Microsoft Azure Cloud is an open, flexible cloud infrastructure and an affordable option for businesses looking to quickly launch applications and back up data in the cloud. Dynamics NAV on Azure allows for flexible scalable growth with included RoseASP services for backups, user counts, NAV modules configuration, monitoring and maintenance.

Microsoft Dynamics NAV (formerly Navision) is Microsoft's flexible solution for mid-size businesses to power their organizations across departments and entities with higher levels of control, insight and efficiency. Dynamics NAV is favorite solution among project oriented business and has been continuously updated to become a cloud-first business solution.
