

## **iPatientCare as a Proud Partner in National Health IT Week Takes Active Participation in Celebration of the 11th Anniversary**

### ***iPatientCare Stays Committed to Celebrate National Health IT Week 11th Anniversary and Exhibits Active Participation***

**Woodbridge, NJ**, September 29, 2016 — [iPatientCare](#), a pioneer in cloud-based ambulatory EHR and Revenue Cycle Management services as a partner in the advancement of health information technology to help improve healthcare, celebrates 11th anniversary of National Health IT week with its active contribution.

National Health IT Week is the premier event initiated in 2006 by the Healthcare Information and Management Systems Society (HIMSS) offering all healthcare stakeholders an opportunity to unite under one banner, expressing the benefits that health information technology (IT) brings to U.S. healthcare. National Health IT Week has emerged as a landmark occasion for using health IT as part of the overall solution to improve America’s healthcare as a bipartisan, federally led, market driven initiative.

The Week consists of events across the country, including [National Health IT Week](#) participants like vendors, provider organizations, payers, pharmaceutical/biotech companies, government agencies, industry/professional associations, research foundations, and consumer protection groups— all working together to elevate national attention to the advantages of advancing health IT.

“iPatientCare is pleased to be a proud partner in National Health IT Week contributing active participation in their initiative of encouraging healthcare participants to use health information technology (IT) and improve patient healthcare and quality. We are committed to achieve health information technology that is integrated, interactive, interoperable, and intelligent which improves the quality of healthcare delivery,” said Jessy Browne, Sr. Application Specialist (EHR/PMS/RCM), iPatientCare.

#### **About iPatientCare:**

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company’s unified product suite includes Electronic Health/Medical Record and integrated Practice Management/Billing System, Patient Portal/PHR, Health Information Exchange (HIE), and Mobile Point-of-Care Solutions for both Ambulatory and Acute/Sub-acute market segments. iPatientCare has been recognized as a preferred MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and professional academies.

iPatientCare EHR 2014 (2.0) has received 2014 Edition Ambulatory Complete EHR certification by ICSA Labs, an Office of the National Coordinator-Authorized Certification Body (ONC-ACB), in accordance with the applicable eligible professional certification criteria adopted by the Secretary of Health and Human Services (HHS).

Full certification details can be found at [ONC Certified Health IT Product List](#).

The ONC 2014 Edition criteria support both Stage 1 and 2 Meaningful Use measures required to qualify eligible providers and hospitals for funding under the American Recovery and Reinvestment Act (ARRA).
