ProShip to Feature the CVP-500 at PACK EXPO

Award-winning packing automation system will be showcased at ProShip Booth #9805

Brookfield, Wis., September 28, 2016 – [ProShip, Inc.](#), a Neopost company, today announced the award-winning CVP-500 will be featured in booth #9805 at PACK EXPO from November 6 – 9, 2016 in Chicago, Ill.

The CVP-500 is a unique packing automation system that optimizes package fulfillment by creating fit-to-size parcels in seconds. The system builds, fills, folds and labels each parcel in one seamless process and does the work of up to 10 packing stations, requiring only one operator. The system can even insert invoices, packing slips or return labels into each package for continuous flow. By creating a custom-fit parcel, less packing material is used, eliminating void fill and creating an environmentally friendly solution. The CVP-500 also reduces DIM weight costs to result in the lowest possible shipping costs.

ProShip will also be hosting a free 30-minute presentation on the Innovation Stage on November 7, 2016 at 12:00 p.m. Scott Eggenberger, Director of Business Development/CVP-500, will discuss why the CVP-500 is the best solution for automated package fulfillment and how it can boost business.

ProShip experts will also be available to showcase this unique, fit-to-size packing solution at booth #9805 throughout PACK EXPO.

“We are excited to feature the CVP-500 at PACK EXPO. Attendees will be able to witness how this green product can optimize order fulfillment and provide increased efficiencies, as well as cost reductions,” said Tim Casey, President and General Manager of ProShip, Inc.
