

SALESFORCE ADMINISTRATORS & DEVELOPERS BE A SUPERHERO!!!

with

CLOUD*SYNC

100% Salesforce native smart sync solution

Introducing 100% native Salesforce data sync application for your Enterprise.

Coming soon on Salesforce AppExchange platform, Cloud*Sync is 100% native Salesforce AppExchange application that helps you seamlessly synchronize, replicate and integrate your configuration metadata and business data between your Salesforce environments.

To learn more, scan QR code below:

Works with:

APTUS

One click synchronize data between multiple Salesforce environments.

Production to any Sandbox
On-demand or Batch mode

Zero code. Seamless flow of Quote-to-Cash data within Salesforce AppExchange applications.

Real time data flow between partner/reseller/distributor Salesforce organizations.

Some of Cloud*Sync Use-Cases...

Resolve your production issues without breaking your production system

Are your end users experiencing bugs in production system? Now you can replicate the bug in your stage or development environment by automatically **migrating production data to multiple environments**. CloudSync can automatically sync specific records and related data from production to sandbox.

Automatically sync your production data to developer sandbox

Save costs by **eliminating need for full-copy sandbox**. Seamlessly move data from production to developer or developer plus environment. You can configure dataset requirements and have CloudSync automatically copy data from production to sandbox - including all related data such as lookup and parent relationships.

One click migration of application configuration data to multiple environments

Do you have your application configuration data setup in stage environment? With CloudSync you can now **easily migrate application configuration data and metadata from sandbox to production** and vice-versa using a single click. For e.g. migrate recently configured product/bundle setup from sandbox to production.

Integrate data between AppExchange applications using pre-built adapters

Have a true fully-integrated Salesforce environment. Now you can **integrate data flows between AppExchange applications** using CloudSync pre-built adapters. Some of the adapters include:

- Salesforce SteelBrick CPQ & Apttus CM
- Apttus CPQ & Zuora Billing

TIRED OF USING EXCEL, DATA LOADER TO MIGRATE COMPLEX DATA? LET CLOUD*SYNC SAVE YOU TIME.
