Superior Recreational Products Releases New 12' Overhead Ladder Products

CARROLLTON, GA – Superior Recreational Products (SRP), a leading manufacturer of recreational products, released today six new 12' overhead ladders and two new climbing components for their Steel Playgrounds product line.

These new overhead ladders were created to be placed alongside an ADA ramp allowing children to play parallel with each other. The goal of the new overhead ladders is to provide a play environment where children of all abilities can interact and play together.

“SRP has a strong commitment to providing new and exciting play opportunities to children of all abilities. We’re excited about these new overhead ladders and we know they will enhance the play value and physical development of the children that play on them,” said Josh Thayer, West Coast Partner Manager.

The 12' Straight Rung Overhead Ladder is similar to traditional monkey bars, while the 12' Arched Trapeze Overhead Ladder and the 12' Double Arched Trapeze Overhead Ladder incorporate an arched design featuring trapeze rings.

The 12' Straight Double Parallel Bar Overhead Ladder and 12' Straight Single Parallel Bar Overhead Ladder offer a unique challenge in that children cross each ladder with their palms facing each other. The 12' Straight Tri-Rung Overhead Ladder features single steel rings and utilizes a wide variety of strength and motor movements.

SUPERIOR
RECREATIONAL PRODUCTS

“The New 12’ Overhead Events are a great addition to our product offering. These events allow us to design structures that can run parallel with our 12’ ADA ramps. The events also provide more of a challenge to our school age children because they have farther to climb, requiring more distance to be covered to get to the other side,” said Charles Jackson, Superior’s Manager of Design Services.

The introduction of the Stepping Stone Climber and Disc Climber brings new and exciting ways to gain access to a play structure’s decks. Both designs utilize stacked stepping stones or discs to create a healthy physical challenge.
