Network Infrastructure | Business Continuity | IT Security | Managed IT Support
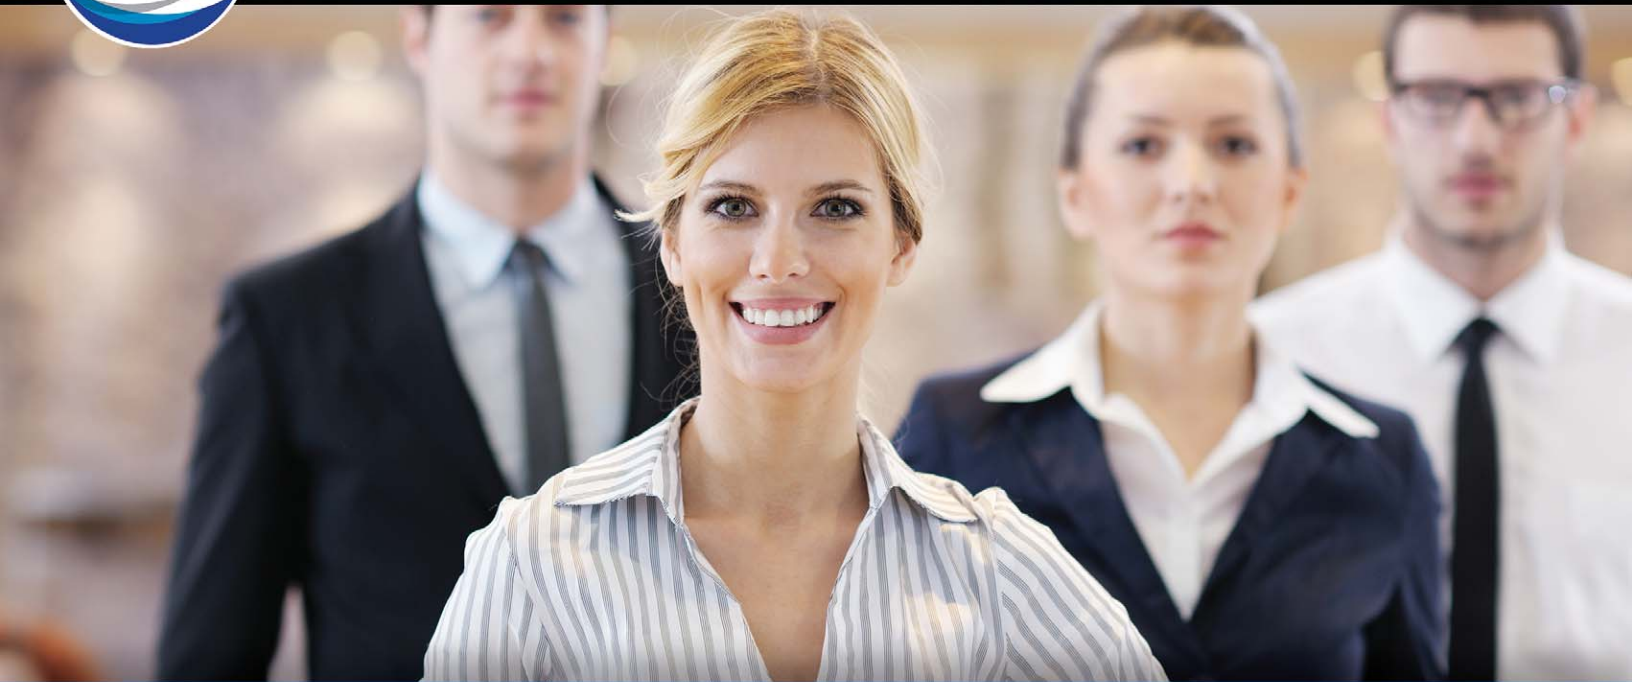

What We Do

We design, implement and support highly scalable and secure technology solutions for both public and private sector clients. Our solutions utilize best-of-breed technologies that bolster local and wide area network performance speed and security. With our Managed IT Support offering, we help organizations proactively manage and monitor their networks. TBNG Consulting seeks to provide our clients with best practice solutions for the purpose of enhancing their operational effectiveness. This management philosophy relies on clear customer communication coupled with solid goal expectations.

Why Choose Us

- 800% growth in the last 5 years
- Over 350 clients in New England
- 2 hr. average to close support cases
- 86% of all support is proactive
- 98.9% customer satisfaction.

We deliver value to organizations by engineering IT solutions to fit client needs with a philosophy driven by experience, product expertise and customer commitment. Working with all sizes of municipal, K-12, non-profit and commercial clients throughout New England, TBNG Consulting is a strategic technology integration partner with Dell, VMware, Brocade, Barracuda Networks, Fortinet, ESET, HP, Cisco Systems and Microsoft.

How We Simplify IT

TBNG Consulting is committed to simplifying IT for your organization. Our experienced team is always available to help customize solutions that are tailored to your specific needs.
