## **Axiomatics Corporate Fact Sheet**

About Axiomatics:

Axiomatics provides externalized authorization through attribute and policy-based access control for applications, databases and APIs. As the premier vendor in authorization, Axiomatics solutions are ideal for enterprises and government agencies that need to securely share information, while complying with complex and ever-evolving regulations. The Axiomatics suite covers the lifecycle of policy-based access control, helping customers to create the framework, implement and maintain their policies, as well as enforce and audit access control.

Website:

Blog:

<https://www.axiomatics.com/blog.html>

Launch Date:

2006

Management Team:

Niklas Jakobsson, CEO  
Erik Rissanen, Chief Technology Officer  
Gerry Gebel, President of the Americas  
David Brossard, VP of Customer Relations  
Srijith Nair, Product Management

Number of Employees:

11-50

Key Differentiators:

Dynamic Authorization: Allows or denies users' access to APIs, databases, and big data systems.

- Simplifies the adoption of Attribute Based Access Control (ABAC) and broadens the scope of use cases where a policy-driven access control approach delivers significant business value.
- Helps customers move with the pace of the changing business and regulatory climate, reduce time and cost in IT development, and speed time-to-market.

Target Audience:

Industries Served

- Banking: Reduces internal fraud risks, enforce real-time authorization controls and roll-out new services quicker.
- Insurance: Provide the right information to all stakeholders in the claims process, while safeguarding all sensitive data.
- Pharmaceuticals: Collaborate securely and effectively with other laboratories and speed up time-to-market.
- Manufacturing: Meet strict and ever-changing export control regulations and secure intellectual property.
- Healthcare: Share patient records between relevant healthcare workers, while safeguarding patient privacy.
- Public Sector: Improve inter-department collaboration, enhance e-services and comply with privacy regulations.
- Media: Protect the production and distribution of media in line with corporate policies and contractual agreements.

#### Product Offerings:

- Axiomatics Policy Server: The world's leading solution for Dynamic and Externalized Authorization Management and a policy-based approach to access control. It's built on the fastest XACML conformant authorization engine on the market.
- Axiomatics Data Access Filter for Multiple Databases: Policy-based authorization on the data layer brings security to a new level. By dynamically filtering and masking data based on user permissions, it applies security at the source.
- Axiomatics SmartGuard for Big Data: Enables users to achieve flexible, dynamic authorization, masking and filtering on Big Data for Hadoop – down to the record and elements levels.
- Axiomatics Review Manager and Policy Auditor: Allows tracking the analysis of all data, ensuring that file and data processing in both batch and real-time is accurate and timely.
- Integrations for 3<sup>rd</sup> party products: Connecting end-to-end traverses many IT layers via portals, microservices, API gateways, ESBs and so on, which is why Axiomatics brings integrations to achieve multi-layered security with fine-grained authorization.

#### Company Milestones:

- Axiomatics was originally founded in 2006.
- In 2013, Axiomatics secured \$6.5 million in funding.
- Axiomatics received FIRA Bronze Member status for their corporate social responsibility strategy.
- 20 percent growth in the number of customers in 2015.
- 20 percent growth in the number of employees in 2015.
- 30 percent annual growth on average since 2010.
- 90 percent revenue growth in 2015 compared to 2014.
