New Comprehensive Optofluidics Catalog from IDEX Health & Science

Catalog of advanced portfolio in optofluidic standard products

Rohnert Park, CA October 20, 2016 - IDEX Health & Science, LCC, the global authority in fluidics and optics for the life sciences market, introduces their new digital and printed catalog of standard optofluidic products. This comprehensive catalog reflects the recent integration of innovative optical companies Semrock and Melles Griot, to bring customers an enhanced portfolio of state-of-the-art components and capabilities.

IDEX Health & Science is respected worldwide for solving complex optofluidic problems and delivering complete development path solutions for analytical, diagnostic, and biotechnology applications. This new optofluidics catalog is designed to address the demand for our portfolio of standard products in the marketplace. The fluidics section of the catalog details fluidic connection, valve, degassing, and column hardware products and information. The optical products section offers shutter, laser, and optical filter products and information.

IDEX Health & Science's fusion of advanced optofluidic technologies is bringing together fluidics and optics to make life science instrumentation innovation faster and easier. Visit <https://www.idex-hs.com/2016catalog> to download a copy of the catalog or to order a printed version.

About IDEX Health & Science LLC

IDEX Health & Science is *the* global authority in fluidics and optics, bringing life to advanced optofluidic technologies with our products, people and engineering expertise. We are respected worldwide for solving complex problems and delivering complete path innovation for analytical, diagnostic and biotechnology applications for the life sciences market. As a genuine and trustworthy partner, we solve our customers' most demanding challenges with the industry's most extensive portfolio of state-of-the-art components and capabilities that are unrivalled in breadth, quality, performance and design. Our vision of the complete path goes far beyond just meeting our customers' needs — it anticipates them, with *intelligent solutions for life*.

Product offerings include: connections, valves, pumps, degassers, column hardware, manifolds, flow cells, microfluidic consumables, sensors, integrated fluidic systems, optical filters, lenses, shutters, laser & light engines, and integrated optical systems.
