

FOR IMMEDIATE RELEASE

Somerset, New Jersey - October 25, 2016

Circular Edge Launches Smart Scheduler Discount Program for Oracle's JD Edwards EnterpriseOne Customers

Small businesses, non-profits, cities, counties, and Canadian companies can now access advanced JDE job scheduling at up to 29-50% off the retail price.

Extending its commitment to offer advanced job scheduling capabilities to Oracle's JD Edwards EnterpriseOne customers of every size and in every industry and location, Circular Edge has launched a new Smart Scheduler Discount Program that provides special pricing to qualified organizations.

Smart Scheduler is an advanced batch process scheduling tool that has been designed to go beyond the limitations of the standard JDE scheduler, featuring streamlined job scheduling with auto notifications, detailed recurrence patterns, workday calendar integration, event-based scheduling, advanced dependency management, support for multiple time zones, and more. Smart Scheduler was developed using the standard JDE toolset and interface, making it easy to set up and maintain jobs.

During the promotion period, Smart Scheduler subscription and purchase options with up to 29-50% discounts will be offered to EnterpriseOne customers in the following categories:

- Public Sector, Government & Non-Profit
- Small Businesses (Under \$50M in revenue)
- Minimum JDE footprint (such as Financials only)
- Small number of jobs (50 or less)
- Companies in Canada and other select international markets

"We have heard from a number of system administrators in non-profits and the government sector, as well as ERP managers and analysts, about how they want to use Smart Scheduler to more effectively manage jobs. With these deep discounts, we hope to remove the cost barrier for EnterpriseOne customers looking to save time, improve operations, and adopt Smart Scheduler as a best practice well before the standard JDE scheduler becomes a source of pain," said Circular Edge Chief Executive Officer sAchin cHoudhari.

About Circular Edge

Circular Edge, started in 2003, is a full-service Oracle JD Edwards and Cloud service provider. We work with a single point of focus—to help our clients enhance their operational efficiency, customer relations, and profits. Being a resolutely customer-focused company where the interest of the customer dictates every strategic decision, we have built the most diverse Oracle JD Edwards and Cloud resource pools. For more information about Circular Edge, visit www.cicularedge.com.

Disclaimer

To ensure reasonable installation volumes, there will be limited availability each month, with excess demand being subject to a first-come, first-served waiting list. Circular Edge reserves the right to change the qualification criteria and/or discontinue the discount program in the future.
