

INTRODUCING

ONE *vibe*™

by *marimba one*™

marimba one™ revolutionizes the 3-octave vibraphone

Experience the new One Vibe™ by *marimba one*™ : our full-size keyboard has amazing projection, warmth and resonance. Designed from the ground up by Ron Samuels and the same team of engineers and master craftsmen that bring you the world's most respected marimbas.

Our vibraphones are 100% designed and built in Arcata, California, USA.

INTRODUCING

ONE VIBE™
by *marimba one™*

Full-size keyboard is 100% evenly dampened

When using the damper bar, all keys from top to bottom are 100% evenly dampened. We build a fine adjustment into the damper bar.

Izzy™ height adjustment system

Our gas spring height adjustment system allows you to raise and lower the vibe smoothly and effortlessly. Built-in tape measures insure your preferred keyboard height.

Easy to transport

The most rigid frame in the industry, the easiest to assemble, and the lightest weight at 111 pounds (50 kg).

Fans always stop in the vertical position

No need to adjust the fans to the fully open position. The player is guaranteed the full resonance and projection of the vibe every time the motor is turned off.

Adjustable damper pedal

The player can adjust the height of the damper pedal. The damper pedal swivels from side to side.
