Introduction to Myooz-ik Limited

Myooz-ik has developed a set of **protocols & methods** which establish **seamless dynamic networks between devices** in the **total absence of internet or telco connectivity**.

These protocols influence a wide range of industries, geographies & demographics.

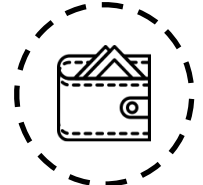

Music   **Humanitarian**   **Media Distribution**   **Telecoms**   **Payments**

The **Team** has launched its first application. Myooz. The Company is now seeking an investment partner to grow the business and maximize the technology's revenue potential.

Mike Gillespie
Chief Executive Officer

A renowned artist manager and music producer. he has worked with Led Zeppelin. The Corrs & Underworld.

Cristiano Diamanti
Chief Technology Officer

Founded Italian internet service provider Netkom in 1995. He is an expert in infrastructure design and complex web & mobile applications.
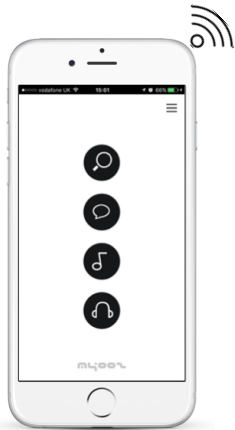

Adrian Corker
Creative Director

A music composer. he conceived the first product to exploit this peer to peer technology. the music discovery & music sharing app Myooz.

Mark O` Flynn
Alliances

A senior sales executive in the payments industry. he is multilingual and has worked across a broad range of sectors and geographies.

Imagine being able to hear what people nearby are listening to on their headphones in real-time, and to be able to chat & interact socially even when there is absolutely no internet connectivity

Myooz. the first application of the technology. introduces "**sound peering**"

A 3rd form of digital music distribution alongside downloading & streaming. Sound peering does not require an internet connection.
