

Capacity Planning

How does Capacity Planning help with my event?

With Gather Digital's Capacity Planning feature, you can anticipate and prevent room overflow challenges. Simply set an attendance limit on a particular location (e.g. 75 people) and mark a session at that location as constrained. When your attendee taps the app button to add that session to their My Schedule, the app will check and make sure there is still capacity at that location and also check that the attendee has not already booked another session at the same time. No double-booking allowed.

Event Title Breakout Session #2	Location Booth 112
Visual Cue (optional) none	Capacity Constrained: <input checked="" type="checkbox"/>
Start Time 02:15 PM on Sat, Oct 31, 2015	Speaker(s) Shelley Heal
End Time 03:15 PM on Sat, Oct 31, 2015 <i>no end time</i>	Check In Type Unverified
Description [Rich text editor]	

You'll be able to see a report at any time as to who has reserved a spot in that session, and you'll be able to monitor for sessions reaching capacity. Feel free to move the session to a larger location or create an overflow room to keep things running smoothly.
