Large US Insurer selects TAI Connector for Enterprise Data and Systems Integration in Reinsurance

As part of its financial transformation initiative, leading US insurer has chosen TAI CONNECTOR as the primary system integration tool for managing reinsurance data transfer.

Orland Park – January 6, 2017 – TAI (Tindall Associates, Inc.) the U.S. market leader in life reinsurance software solutions welcomes one of America's largest life insurer as premier client of TAI CONNECTOR for secure extraction and transmission of reinsurance data as part of its financial transformation initiative.

TAI CONNECTOR, one of two new software solutions launched in 2016 by TAI, is an intuitive, self-service data movement utility that enables individuals to fully utilize and unlock the value of their reinsurance programs within the TAI Reinsurance System. Minimal expertise in SQL or understanding complex table structures are required, allowing users to query the data, create custom extracts and securely transfer data to external parties and feed internal peripheral insurance systems without the reliance on traditional IT support.

By using TAI CONNECTOR, the client will benefit from:

- A fully automated systems integration between TAI and its SAP landscape.
- A fully auditable environment, with traceability and source system identification, allowing insurer to validate assumptions and improve data quality, a key to reinsurance data transformation.
- Extract and unlock the value of reinsurance programs with minimum technical expertise while enabling insurer to integrate policy, coverage, treaty, claims, and billing data with other internal systems and securely transmit data sets to external reinsurance partners

"TAI has been a strong business partner for over 30 years. As part of our financial transformation initiative, we needed a way to consistently and autonomously integrate data from our reinsurance business with our central ledger. TAI's strong background in reinsurance and software made our decision to go with TAI CONNECTOR an easy one." states Corporate VP, Reinsurance Administration.

Mitch Ocampo, Chief Technology Officer of TAI adds, "Over the last year our team has worked very hard to create software that further benefits the re/insurance community. It's extremely gratifying to work with our clients and bring these tools to market."
