

Drone Services

Benefits:

- Jobsite Flyover
- 3D Modeling
- Aerial Sitemap
- Jobsite Documentation
- Promotional Flyover

Applications:

- Construction Site View
- Real Estate Sales
- Marketing and Promotion
- Project Management
- Land Surveys

The New Frontier - An Aerial View of your Site.

Ecamsecure's drone services can help you manage the following areas of your business:

- Assess Security Vulnerabilities
- Contractor Management
- 3D Modeling
- Project Management and Annotation
- Gas Leak Detection
- Aerial Sitemap
- Promotional Videos

All of the above services are available by ECAMSECURE, and cost only a fraction of the price of enacting these services using traditional methods and manpower. For instance, a promotional flyover for marketing purposes would have cost many thousands of dollars using a helicopter and pilot. Save time and money with an ECAMSECURE drone flyover and quickly receive a professional video of your job site.

What Are the Benefits of utilizing ECAMSECURE's Drone Services?

- Significantly more cost effective than traditional methods
- Able to reach places/heights/tight spots that traditional methods couldn't
- Tailored use - Rent the drones on occasion or for the duration of your project
- Provides immediately actionable data and information for project management
- Multiple uses for a single drone without the need for different and expensive equipment
- Unobtrusive, small, powerful
- Software that highlights the most important details from your data
- Impressive flyovers and marketing materials for clients
- Aerial view makes planning and adjusting on-the-fly easy
- Frequent use of flyovers/3D modeling means incredibly accurate and comprehensive progress data

The ECAMSECURE Drone Service Advantage:

- FAA Licensed and Insured
- FAA 333 exemption to fly our drones at night
- Officially trained pilots with extensive training flying drones
- Professionally edited videos
- Only the highest resolution cameras are used on our drones
