

ConnectLED

Wireless iOS Lighting Management for Evluma AreaMax™ & OmniMax™

ConnectLED™ is an easy-to-use iOS application that communicates with both the AreaMax LED luminaire for street and area lighting and the OmniMax LED retrofit via Bluetooth® Low Energy (BLE).

Configure and control your lights to enhance energy and maintenance efficiency.

OVERVIEW

Bluetooth Low Energy

Operating Range
Up to 150' from lamp

iOS Device:
iPhone 5 & higher
iPad Mini, iPad Air, iPad Pro

iOS Versions:
iOS 8 & higher

Licensed Based
BASIC, ENTERPRISE, PROMO

Evluma Proprietary
Compatible with
AreaMax, OmniMax

Connect/Disconnect

Easily manage the use of electricity from the ground during the transfer or disconnection of service and save on maintenance. Perfect for areas that only require seasonal lighting. Operates up to 150' from lamp. Line of sight recommended.

Lamp Brightness

Need less light due to location (light trespass), or energy budget? Define brightness settings that also save energy. Perfect for light sensitive areas. Match the IDA approved AreaMax models with shields for the best Dark Sky Friendly results.

Dimming

Get the right light for the right time. Maximize smart energy savings when setting custom dimming schedules for anytime between dusk and dawn. Three separate settings with a 20% output minimum.

Lamp Status

Quickly review a summary of lamp settings, access event history and monitor Photocontrol Failsafe™. Reads the status broadcast from the AreaMax during the day - the hardest time to troubleshoot a light!

Advanced Settings

Add clarity to asset management programs with customized lamp names, writable utility fields and GPS location details. Easily share data with Evluma technical support.

Contact Evluma to obtain your license. Choose between the fully functional ENTERPRISE license, or a limited BASIC license. PROMO license packs are available when purchasing an AreaMax 4 x 4 or OmniMax 3 x 3 pilot. Download ConnectLED from the App Store to your existing Apple device to communicate with your Evluma lamps, no additional hardware or node required. ConnectLED connects to each AreaMax and OmniMax individually. Each Evluma lamp will flash to confirm your initial connection. A sequence of flashes indicates successful programming.

ConnectLED™ & Photocontrol Failsafe™

Evluma's Photocontrol Failsafe operates independently of ConnectLED guaranteeing continuous dusk-to-dawn illumination regardless of photocontrol failure. Use ConnectLED to update lamp GPS location and monitor Photocontrol Failsafe status.

ORDERING INFORMATION

LICENSE DESCRIPTION	CATALOG NUMBER	LAMP FLASH QUICK REFERENCE CONNECT/ DISCONNECT
ConnectLED iOS Basic 3 User Pack	CLED-IOS-BASIC-3	DAYTIME CONNECT. The lamp will come on and stay on for 10 minutes then shut off.
