FOR IMMEDIATE RELEASE

Vision-Box signs framework agreement with Schiphol Airport

A new biometrics-based seamless passenger-walkthrough will modernize passenger journey experience in the scope of the ongoing Digital Airport Program

Amsterdam, February 9th, 2017 – Representing one of the most expected announcements in the Aviation Industry, the design and deployment of a **large-scale modernization program aims at facilitating the entire passenger journey throughout the airport for all types of passengers, whilst increasing terminal capacity.** New technology will be tested from 2017 to offer passengers a **seamless experience, increase throughput, eliminate bottlenecks, thus enhancing capacity** within the existing footprint.
After thorough market research, Schiphol selected Vision-Box, the Passenger Experience leaders responsible for processing over 200 million passengers per year at borders worldwide, to take up the challenge. Vision-Box met the highest standards of know-how, trust and experience for the endeavor and will thus be responsible for implementing, one of the founding streams of the overarching **Digital Airport Program** announced earlier this year.

The framework agreement consists of a **long-term modernization program that will bring to life a pioneering end-to-end biometric-based passenger journey**. It is founded on **completely redesigned, document-less, self-service passenger-centric touch-points**. The program will **transform conventional physical and psychological barriers into a standardized, yet streamlined, seamless passenger-walkthrough experience.**

Miguel Leitmann, CEO at Vision-Box, stated that **"**We are proud to announce this real premiere in the Aviation industry at Amsterdam Airport Schiphol. Our commitment is to present a **completely modernized passenger experience**, based on a **shared vision of the digital airport.** The redesigned Schiphol Airport journey will offer the **best-in-class human-machine experience, a memorable passenger-centric walkthrough from curb to cabin and a seamless gateway into the future."**

About Vision-Box™

Founded in 2001, Vision-Box™ is the leading provider of electronic identity solutions, intelligent security management, and automated border control systems that use ICAO-compliant standards.

The biometric border control portfolio aimed at airports, airlines and immigration authorities, includes solutions addressing a variety of business scenarios which englobe security check-points, self-boarding gates and automated border control gates.

Every second, millions of images are being captured and processed by Vision-Box™ systems, installed right at the heart of the most prestigious organizations, who trust our biometric identity and digital video management solutions for their critical applications.

Covering the entire ID management life cycle, Vision-Box™ also delivers, to governments and issuing authorities, solutions ranging from live biometric enrollment stations, document verification kiosks and digital document dispensers.

Starting with the process of identity enrollment, covering the life cycle of a biometric identity document and finally assuring its verification and identification towards the user, Vision-Box™'s product portfolio is linked together through a powerful service platform, which orchestrates the trusted chain of identity of the citizen. Vision-Box™'s solution portfolio enables the implementation of advanced border management systems, integrated with advanced digital video analytics solutions, intelligent biometric and biographic data management engines and danger management functionalities.

Vision-Box™ operates over 1200 Automated Border Control solutions in more than 70 international airports and has over 3000 electronic identity systems deployed across the globe.
