**Washington County Health and Human Services, Oregon
selects**

EnSoftek's DrCloudEHR™, Specialized Patient Outcome Based EHR

Washington County Health and Human Services' with a mission to promote health and well-being of the community by influencing policies, systems and environments, selects cloud based Electronic Health Record (EHR) system, DrCloudEHR™, built by EnSoftek, to manage their Human Services (Mental Health, Addictions and Developmental Disabilities) programs.

Beaverton, OR (PRWEB) January 23, 2017

The Human Services Division of Washington County Department of Health and Human Services (HHS), responsible for service coordination of the behavioral health, addictions and developmental disabilities programs for the county, is implementing Dr Cloud EHR™ to address a wide variety of needs for the various programs to enhance and improve documentation and health outcomes, quality measures including health plan data and trends.

EnSoftek's commitment to provide consistent quality care while measuring and documenting outcomes, "The Golden Thread™" module to insure audit compliance, Measures and Outcomes Tracking System (MOTS) integration, and an easy to use program were some of the major driving factors in selecting DrCloudEHR™ over other top EHR products in the health and human services market.

"We are very excited to have DrCloudEHR™ be selected by Washington County, a founding partner of Healthy Columbia Willamette Collaborative (a public private partnership for collaboration around health improvement plans and activities), which is so focused on Health Outcomes and Health Factors.", said Ramana Reddy, President/CEO of EnSoftek, adding, "Our commitment to those who are involved in the recovery process is visible in all facets of our solution."

Washington County Department of Health and Human Services provides prevention, protection and support services and activities so that all people who live, work, study and play in Washington County can be healthy, self-sufficient and safe. The Human Services Division administers Medicaid behavioral health plan benefits for county residents under the Oregon Health Plan (OHP) and is procuring the DrCloudEHR™ solution, to enhance and improve health outcomes.

About Washington County, Oregon

Washington County is a suburban county located on the western edge of Portland, Oregon. Its boundaries extend from the City of Portland to the coast range. The current population is approximately 530,000 people. There is a mix of urban, suburban and rural areas. The eastern half of the County is composed of service industries, light manufacturing, residential and commercial activity. It is relatively densely populated. The western half is primarily farms and rural settings together with several smaller incorporated and unincorporated communities. The County has experienced substantial growth over the last several years principally in the electronics and high tech industries. Over half of the entire state's population growth in the last five years occurred in Washington County.
