The Grey & Black Advantage

Two sets of expertise. No compromises.

Gotham Security and Greyline Solutions have teamed up to create the Grey & Black Advantage for registered investment advisors, hedge funds, and private equity firms.

This package of services combine our deep experience with Security and Exchange Commission (SEC) cybersecurity regulations and the most technical vulnerability protection available.

How Does The GREY & BLACK Advantage “help my firm?”

The Grey & Black Advantage includes the majority of the continuous cybersecurity components necessary for SEC compliance as an annual subscription.

Security and Exchange Commission rules are taken from the National Institute of Standards and Technology (NIST) Risk Management Framework created by the US Dept. of Commerce.

- 1. Governance and Risk Assessment:** Gotham Security's Risk Assessment goes above and beyond the SEC's requirements. Many regulated firms have established governance programs with written information security policies but lack the continuous assessment to be fully compliant. The Grey & Black advantage subscription model of security services provides any auditor proof that your networks are being continually re-assessed.
- 2. Vulnerability Assessment:** We conduct internal and external vulnerability assessments of your network using scanning tools hackers use in the real world to exploit vulnerabilities including un-patched systems, default passwords, or out-of-date software. We then deliver a detailed report including findings, criticality levels and directions on how to remediate each finding.
- 3. Written Information Security Policy (WISP):** We create and review your firm's Management, Operational and Technical Controls through interviews, continually analyzing how you do business. The result is a policy that is relevant for your organization and customized to be efficiently adhered to and easily enforced.
- 4. Phishing and Security Awareness Training:** Gotham Security will conduct a sixty minute in-person workshop on Proactive Security and Privacy Awareness. The presentation is interactive, designed for all participants to engage. A pre-approved phishing campaign will be delivered once before the training session (including basic and advanced techniques) and once after the session to track improvement.

PRICING:

Please inquire for our monthly pricing.

To get started with the **Grey & Black Advantage** or for more information, please contact us at [917.734.4120](tel:917.734.4120) or info@gotham-security.com.

We are here to help and are more than happy to answer any questions you might have.

Gotham Security also provides all cyber security services needed to meet SEC requirements including Penetration Testing and Security Operations Center Monitoring which can be quoted separately.
