

ThoughtFocus' presents Digital Transformation within Aerospace and Defense Manufacturing at SAP A&D Innovation Days

The business strategy briefing session focuses on the challenges and benefits of managing an innovative multi-site SAP implementation across multiple divisions in a global manufacturing organization

Irvine, CA – February 28, 2017 – ThoughtFocus, a leading consulting, engineering and business process management firm serving the [aviation and aerospace industry](#), and [Gold Sponsor](#) of the SAP A&D Innovation Days conference in San Diego, CA, will host a key conference presentation on the digital transformation of a complex, multi-site global organization into a nimble, unified, and quality-assured manufacturing enterprise. The business strategy briefing session for prominent aerospace and defense manufacturing executives will take place on March 8, 10:30 – 11:30 am.

The presentation will feature the experiences of REV Group Inc., a global manufacturer of specialty vehicles for recreation, public safety and public service, and how REV is digitally connecting its vast enterprise incorporating three operating divisions, 27 brands and 16 manufacturing locations.

“From vision creation to implementation, transportation manufacturing leader REV Group is tapping the power of SAP S/4HANA to digitize, integrate, automate, and connect its worldwide operations, turning to the [ThoughtFocus](#) SAP implementation experts to steer their journey,” noted David Deal, General Manager, Aerospace, ThoughtFocus.

Led by REV Group CIO Stephan Engler, the presentation reveals how digital technologies ranging from sensor fusion, Big Data analytics and cloud computing, to predictive analytics, self-learning systems, and autonomics are driving change throughout their manufacturing enterprise, providing process breakthroughs that are accelerating production, improving reliability, shrinking cycle times, and reducing overall costs of operation.

“A task of this magnitude and velocity requires what only SAP S/4HANA can deliver, and the implementation expertise ThoughtFocus can provide,” Deal added. “With direct parallels to aerospace and defense manufacturing, we are looking forward to sharing our lessons learned on this successful lean transformation journey with A&D innovators who are seeking to realize a higher level of customer satisfaction and return on investment.”

About ThoughtFocus

Privately held ThoughtFocus is a US-based consulting, software development, product engineering and business process management firm. With local offices in the US, supported by state-of-the-art

development and out-sourcing centers in India and the Philippines, our global team of over 1,300 associates serves clients in the financial services, manufacturing, education, payment and loyalty, insurance, aerospace and technology industries, helping them meet their most critical business objectives. ThoughtFocus is a Blackstone Innovation Fund portfolio company. For more information, please visit www.ThoughtFocus.com.
