ORGANIC LAWN CARE MADE SIMPLE

LOCAL BUSINESS SELECTED AS CERTIFIED PROVIDER FOR CENTRAL NEW YORK.

Binghamton, New York: 02/24/2017 - **Turf Grow Organic** announces that it has been approved by Organic Lawn Care Institute as Central New York's Organic Lawn care provider.

Making the environment safer one landscape at a time is the mission of Turf Grow Organic, a Binghamton-based company specializing in products for sustainable landscape management and organic lawn and garden solutions.

Turf Grow Organic is providing land care that is environmental-friendly and safer for children and pets. The Turf Grow Organic products and system allow us to provide commercial and residential customers a solution to the growing concerns of the environmental damage and health safety issues caused by use of synthetic chemical fertilizers and toxic pesticides.

As a Dealer and Applicator, **Turf Grow Organic** has received intensive training in organic science, access to proprietary organic products, and a proven application system. Sustainable Land Care offers customers a natural, organic alternative to manage landscapes and the chance to share in the mission of creating a safer environment.

The **Turf Grow Organic** system includes: Organic Lawn Management, Organic Tree and Ornamental Programs, Storm Water Run-off Solutions, and Natural Pest Control. Turf Grow Organic's unique product technology and patent-pending application system introduces beneficial microbes into the soil web and eliminates the need for synthetic chemicals and pesticides on lawns and plants.

Call today to discuss the process of having a beautiful lawn without compromising our environment and your family safety.
