About SIMON and GetPayroll

Launched August 15, 1991 by Charles Read, Custom Payroll Associates, Inc. (CPAi), is a leading full-service payroll, and payroll tax processing company for small to medium-sized businesses across the United States. Originally a mobile onsite accounting franchise, Charles Read transformed the business into its present day incarnation after the franchisor went out of business. In 1999, he successfully maneuvered changing market demands and increased technology to retire the mobile portion of his business to provide easier services offsite. He expanded CPAi's operations to provide services nationally.

In 2005, Payroll On A Budget was created to deliver affordable, high-quality, paperless payroll processing via the internet to smaller companies with one to ten employees as a way to capture a market previously untapped by CPAi. Payroll On A Budget was the first "green payroll" in the country. Charles is responsible for the launch of GetPayroll, a fresh new take on his current business designed to attract a younger market requiring assistance managing their business' payroll and tax obligations. His leadership and direction has grown CPAi steadily at a rate of 10% annually and placed it in the top 10% in size for payroll processing companies. Always striving to improve upon existing services, SIMON is now in development and is set to be a revolutionary new product. Simon(tm) 3-click(tm) paperless payroll will change the small business payroll landscape upon its release in March 2017.
