

Spring Lawn Treatments You Need to Get

Have you looked at your lawn lately? [Chances are winter hasn't been too kind](#) to it. Winter dormancy can wreak havoc on your lawn. This is why giving your lawn the treatments it needs to stay healthy, green, and lush is essential. Treatments ensure the health and vitality of your lawn, making it look greener throughout the spring and summer, while also blocking pesky invasive weeds.

Here is a step by step plan on how to get your lawn ready for the warm weather ahead:

- **Evaluation:** Healthy lawn care starts with a comprehensive evaluation by your Giroud Representative. They can help identify any treatment your lawn needs to encourage long term health.
- [Treatment Program:](#) Utilizing our traditional or 100% organic lawn care program will deliver a custom plan tailored to your lawn's needs. This includes a comprehensive plan to eliminate and prevent weed growth, crabgrass control, fertilizer treatments, and more!
- **Monitoring:** Our PA Certified Lawn Technicians will always be there for you, monitoring your lawn throughout the year to give you the best results.
