New Doctor-formulated Fat-burning Supplement Launched by Trim® Nutrition, Inc.

Clearwater, FL-based medical company launches new doctor-formulated supplement, Trim® SuperBurn™, for ultimate fat burning and sustained energy with beta hydroxybutyrate for the benefits of a ketogenic diet without carb restriction.

Clearwater, FL—April 4, 2017—[Trim® Nutrition Inc.](#), the flagship brand of Wellness Health Management, Inc.—a medical company specializing in development, manufacture, sales and distribution of high performance health and wellness products and services—today announced the launch of [Trim® SuperBurn™](#), the ultimate fat burner for sustained energy and weight loss support with beta hydroxybutyrate (BHB) for the benefits of a ketogenic diet without carb restriction.

Doctor formulated with premium ingredients, Trim® SuperBurn™ was created for people looking to lose fat, increase lean muscle mass and improve athletic performance and is available now online and in select, south Florida retail locations.

“We are very proud to support the movement toward more carb conscious diet and exercise regimens. Trim® SuperBurn™ was specifically engineered to be a major component of our newest weight management and fitness program, [Trim® Carb Revolution™](#). The program combines carbohydrate cycling with intermittent fasting—a cutting edge system designed to reset the body’s fat burning hormones and accelerate metabolic drive,” said Brent Agin, MD, President and CEO of Trim® Nutrition, Inc.

Trim® SuperBurn™ contains a potent combination of nutrients, including BHB, for enhanced metabolic efficiency, improved cognitive function, sustained energy, enhanced athletic performance and appetite suppression. With Trim® SuperBurn™, active individuals can achieve a keto-adapted state without a ketogenic diet.

BHB is a ketone body which provides sustained energy for the brain, heart and muscles and is produced and burned under special metabolic conditions such as fasting and ketogenic diets. When the body has limited carbohydrate stores, such as during prolonged exercise or after fasting, ketones are particularly valuable energy sources. BHB supplementation has been used to support weight management, cognitive health, and athletic performance. BHB supplementation is good for people on low-carb diets and people looking to lose fat and increase lean muscle mass.

A 30-day supply of Trim® SuperBurn™ contains 120 capsules and retails for \$39.95 and is available online at TrimNutrition.com, TeleWellnessMD.com, Amazon.com, and in select retail locations. All Trim® Nutrition supplements include a 60-day money-back guarantee. All Trim® Nutrition products are manufactured in the USA with Guaranteed Purity and Potency in accordance with Good Manufacturing Practices (GMP), among the highest standards in the world.
