

GroBucket: Ordinary Bucket turned Portable Self-Watering Garden

Summary: The GroBucket is a sustainable recycled plastic insert that transforms everyday buckets into low-cost portable self-watering gardens. This versatile system grows most any plant anywhere--Grow even the big stuff in small spaces.

GROBUCKET

Introducing the newest innovation for home gardening and a groundbreaking tool for urban farmers: GroBucket – A revolutionary recycled plastic insert that transforms ordinary buckets into portable self-watering gardens. This low-cost device fits snugly at the bucket bottom creating a water reservoir that allows for optimal water/air transfer for healthy roots. GroBucket is the new growing solution, equipping gardeners of any age and ability to grow food at home with zero guesswork.

HOW IT WORKS: Get-Read-Grow!

GroBucket offers the greenest to the most seasoned gardener a unique growing option that starts with the GroBucket insert, PVC pipe and floating water level gauge dropped into an ordinary 4-6 gallon bucket. Simply pour in soil mix and add your plants. To water, fill the water reservoir through the PVC fill tube. The soil's wicking action delivers water to the plant as needed. Any excess water drains out through a hole in the side of the bucket eliminating the risk of oversaturation and root rot. The level gauge tells you when to add water—No more guesswork. That's all there is to it! GroBuckets easily accommodate nearly every plant you'd normally grow in a traditional garden. Plus, flowers, house plants, and even shrubs and dwarf fruit trees thrive in GroBuckets and they're a cinch to move.

GroBuckets benefit beginners to expert gardeners who can complement current techniques with additional crop space, extended growing seasons, and over-wintering with ease. GroBucket plants grow practically anywhere indoors or out—a sunny window, by grow-lights, or outside on your balcony, patio, back-deck, or front porch. So simple, a small child can use it and so accessible, those with mobility limitations can easily garden from a seated position. GroBuckets are fun to decorate or can be slipped inside ornamental planters for added flare.

GroBucket

GROBUCKET BACKER

GroBucket has been designed and prototyped and now it's time to produce. A crowd-funding Kickstarter campaign is being launched to raise the necessary capital to get GroBuckets to the consumer. When you support the GroBucket Kickstarter campaign, you become a "GroBucket Backer." The purchase of a GroBucket not only enhances your ability to easily provide fresh homegrown produce, you can also opt to join a movement that has global impact from our struggling inner-cities to third world countries. One of the Kickstarter rewards allows GroBucket Backers to put money toward the purchase of GroBuckets to help heal struggling inter-cities via urban gardening. GroBucket is also starting an effort to send GroBuckets across the globe for international missions, including orphanages, to empower and educate how growing food with this simple concept can increase self-sufficiency and financial security. Your support helps generate funding to purchase the molding equipment necessary for mass production and pays for packaging and shipping.

WHY GROBUCKET

GroBucket is simple, inexpensive and low maintenance—minimizing watering and weeding. GroBucket is environmentally-friendly, made from recycled materials, and is easy to set-up, producing immediate growing satisfaction. GroBucket fits every lifestyle by creating gardens indoors or out, from high-rise city life, suburbs, to homesteaders. GroBucket is the newest way to simply improve health and lifestyle, all while changing the sustainability of local inner-cities and international communities. GroBuckets are easy to store when not in use, stacking to only one square foot floor space.

GroBucket—a revolutionary low-cost portable self-watering container garden that turns any brown thumb green with abundant produce and environmental sustainability!
