

SAFE-T-SCOPE 180™

180° DUAL VIEW CAMERA SYSTEM

Rosco's Safe-T-Scope180™ has the proven reliability of the Safe-T-Scope® Series of Camera systems with simultaneous front and rear coverage of the vehicle to comply with Abigail's Law.

Bus operating conditions demand the highest level of awareness by the bus operator. Safe-T-Scope180™ provides front and rear visibility to the driver to help prevent collisions with Vulnerable Road Users (VRU's), objects and vehicles around the bus.

Enlarged split view of front and rear of the bus.

Safe-T-Scope180™ has been developed to reduce collisions and increase safety. Two camera images either shown together or separately provide two views in front and behind the vehicle, reducing blind spots and displaying VRU's and other obstacles in blind zones.

- Two cameras each with 180° Field of Vision allow the driver to see everything in front and behind the vehicle.
- Audible alert when split view comes on.
- A split view ensures excellent coverage and compliance with Abigail's Law.
