

MISSION

Improve the quality of life for big dogs by providing handcrafted, American-made beds that help alleviate joint pain and enable dogs of any size to rest comfortably.

ABOUT BIG BARKER

Founded by Eric Shannon in 2012 and headquartered in Philadelphia, Big Barker manufactures and sells the highest quality dog beds available and nothing else. Shannon founded the company when his 92-pound mix, Hank, was diagnosed with hip dysplasia at an early age. With a lack of products aimed at big dogs, Shannon set out to engineer and manufacture a big dog bed — and Big Barker was born.

Today, Shannon serves as Founder and President of Big Barker. The family owned and operated company has donated Big Barker dog beds all over the United States, including to police K9 units, rescue shelters, veterinary hospitals, working dog organizations and more.

WHY BIG BARKER DOES IT

Across America and the world, big dogs are prone to painful ailments that are exacerbated by sleeping directly on the floor or on cheap, unsupportive dog beds. Big dogs can suffer in silence from things such as arthritis, hip dysplasia, ACL tears and repairs, Wobbler disease, and stiffness and slowness resulting from older age.

HOW BIG BARKER DOES IT

We offer dog lovers a clear choice: Keep paying to replace poorly-made dog beds that flatten and fall apart, or let us protect your dog with our pet-industry leading, “Can’t Flatten, Won’t Flatten” 10-year warrantied bed.

Incorporating cutting-edge foam engineering with state-of-the-art pressure-mapping technology, each bed is handcrafted in California from certified Certi-PUR-US® American-made foam. Every Big Barker dog bed includes a stylish, easy-to-clean, furniture-quality cover.
