MVP Systems Software Broadens Customer Base in First Quarter of 2017

MVP Systems Software wins major accounts across broad range of industries in Q1 2017.

1 May 2017 – MVP Systems Software, Inc., a leading provider of enterprise job scheduling and workload automation software achieved record customer growth in Q1 of 2017. IT teams from a wide range of industries have selected MVP's unified job scheduling and workload automation solution, JAMS, to manage their critical IT processes.

"In the last 12 months, we've implemented JAMS for a more diverse set of IT teams than we have in prior years," said VP of Communications Harry Reisenleiter. "While large corporate IT departments still make up a large part of our user base, we've seen a rise in interest from startups, SMBs, education institutions, and the public sector."

The cross-platform capabilities of JAMS and growing number of integrations make powerful automation available for nearly every type of IT infrastructure. JAMS supports workflows that span multiple platforms and applications, both on premise and in the cloud.

"JAMS provides business users the freedom to choose applications that best meet their needs, while providing IT teams the tools they need to incorporate those applications into enterprise-wide workflows," says Reisenleiter. "With JAMS, the benefits of automation accrue not only to IT teams who can continue to focus on strategic tasks, but also to the business users who gain powerful workflows that serve organizational goals."

Some of the latest organizations that have begun to leverage JAMS include:

- Banco Sabadell
- Colorado Bankers Life Insurance
- County of Monterey
- FIS Global
- Fox Sports Australia
- Higher One
- Jamison Capital
- Masonite
- Protech Solutions
- State of Ohio Department of Health
- Sugar Foods
- Wavvo

MVP has expanded its global support teams in all offices in response to the surge in new users. MVP has also added several engineers to its field services team to assist new customers with migrations from legacy scheduling tools.

About JAMS
JAMS is the only job scheduling system built on a .NET framework and is the first enterprise job scheduling system that can be leveraged by both IT Operations Personnel and Application Developers. With its roots in Windows, JAMS also supports running processes across a variety of operating systems (UNIX, Linux, System i, OpenVMS, etc.) and applications (PeopleSoft, SAP, SQL, Oracle, Symitar, Ecometry, etc.) To learn more about JAMS, please visit www.JAMSScheduler.com or call 800-261-JAMS.
