

Paramount WorkPlace Releases Mobile Requisition Application

Full-featured WorkPlace Mobile app will complement company's comprehensive, integrated spend management solution.

Detroit, MI – May 2, 2017 - [Paramount WorkPlace](#), a leading software developer and provider of web-based and mobile spend management software solutions, today announced the release of [WorkPlace Mobile for Requisitions](#), the company's latest innovation in requisition and procurement management software, and part of its comprehensive spend management solution.

Paramount WorkPlace Mobile provides full mobile requisition entry, including both free-form and catalog based requisitioning. Users can browse and shop their catalogs, save items to a shopping cart to process, or submit as a requisition directly from the mobile app. Busy managers and executives can approve or disapprove pending requisitions with a single touch. Employees can view the status of open mobile requisitions from their mobile devices, anywhere, anytime.

Salim Khalife, President and CEO of Paramount WorkPlace, said, "It is no longer enough for a mobile application to simply help someone complete a task. The mobile experience must also help drive customer engagement by being intuitive, engaging and powerful. It is precisely that customer experience that we kept in mind during the design and development of Paramount WorkPlace Mobile, our latest Requisition and Procurement solution offering."

Data security is a primary concern of all companies, and mobile apps that access data on a company's live server present a potential new threat. To eliminate that threat, Paramount WorkPlace developed a unique technology that allows all mobile users to operate outside a company's firewall. Instead requests are routed to an On-The-Go server, and not to a company's live server. Utilizing this innovative technology, Paramount WorkPlace allows mobile users to operate outside the firewall, but have the experience that they are connected to corporate through real-time data connectivity and synchronization.

WorkPlace Mobile is an integral part of Paramount WorkPlace's comprehensive spend management solution that includes enterprise purchase order management, centralized invoice matching, flexible receiving capabilities, vendor contract management, request for quote functionality, an intuitive vendor portal, and a dynamic rules and workflow engine.
