Company history

Founded in 2016, BursysTecX founder Prat Gupta, Ph.D. started this company primarily to build upon the knowledge and success of custom software development and engineering company Bursys founded in 2005. Bursys has been building custom off the shelf distributable software and cloud / SaaS software for its customers for over a decade. Bursys has successfully delivered software to its customers across North America and Europe since 2005. Bursys teams have also successfully delivered countless enterprise projects for fortune 500 companies and understand the functional/technology gaps and pains of small and large enterprises alike.

BursysTecX founder Prat Gupta, decided to develop a cutting-edge technology platform that will deliver software-as-a-service (SaaS) on cloud platform. BursysTecX is a technology innovation company that is delivering the software platform called FieldEquip to deliver ready-to-use out-of-box connected digital field service solution powered by IoT and big data analytics. This software will deliver ultimate value at a very low cost of ownership for different industries. BursysTecX is built to mobilize the workforce like no other company.
