

# The SentinelSecure™ Mobile C2 Workspace for Healthcare

Securely preserve enterprise application functionality for your mobile workforce

**SYNCDOG**

www.syncdog.com

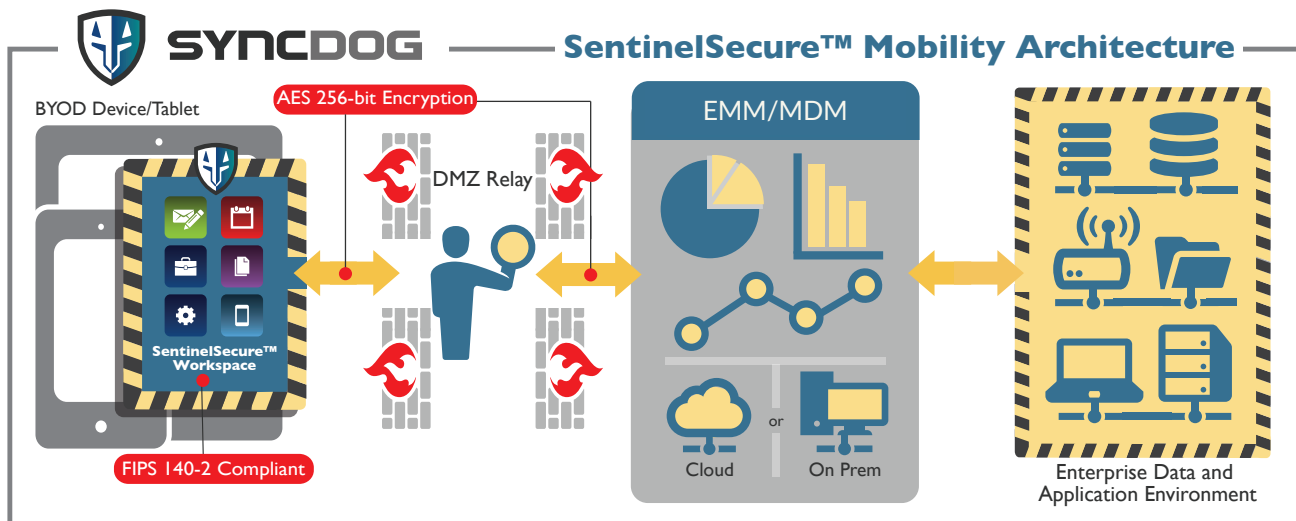

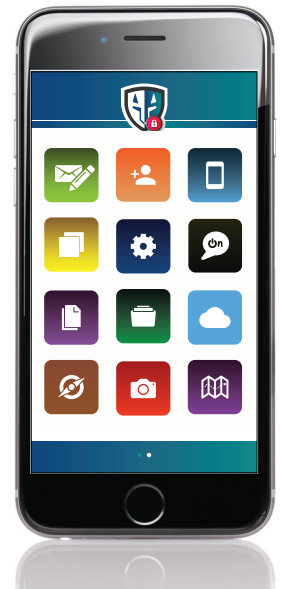

For more than a decade, mobile employees have been working with one hand tied behind their backs, with restricted abilities to easily and effectively collaborate with the corporate office, with peers, with partners, and with customers. When mobile collaboration is restricted, productivity and efficiency take a hit—and so does the bottom line.

The SentinelSecure™ C2 Workspace (containerized & collaborative) for Healthcare removes that limitation, enabling unrestricted, unimpeded, and totally secure collaboration between mobile employees and their enterprise ecosystem. The C2 Workspace's connection is protected through FIPS 140-2, AES 256-bit encryption.

A full suite of mobile-enabled productivity applications is available in the C2 Workspace:

- **Secure Enterprise Communications:** Email Client, Email Contacts, Calendar
- **Secure Enterprise File Management:** Briefcase, File Sync, DropBox, File Manager, Office Suite, Annotate, Secure Camera/Image Roll, SharePoint
- **Secure Internet/Intranet:** Secure Browser, HTML 5 Hybrid Mobile App Frameworks, Enterprise IM, Secure Chat
- **Secure Location-based Services:** Geo-location, GPS Tracking, Geo-fencing, Maps

**C2Workspace**  
powered

The SentinelSecure™ mobility architecture consists of a remote mobile containerized & collaborative workspace integrated with an Enterprise Mobility Management system. SentinelSecure™ also provides support for derived credentials and recovery keys.

SyncDog provides flexible pricing options and the workspace can be procured directly from SyncDog or through partner channels. SentinelSecure™ also holds certified integrations with MobileIron, Snow Software, and Notify Technology, Inc. For pricing information, contact us at SyncDog.com.

## SyncDog SentinelSecure™ Integration

SentinelSecure™ ships with integration to a multitude of Enterprise Mobility Management (EMM) systems. With SentinelSecure™, you get a defense-grade containerized workspace that serves as a complementary layer of security to your existing InfoSec investment. Your mobile app workspace is fully integrated into your EMM/MDM and your network perimeter remains secure.

SentinelSecure™ is currently integrated with the following EMM solutions: MobileIron, Notify Technology, Inc., and Snow Software. For more information on integration please visit [SyncDog.com](http://SyncDog.com).

## Migrating to SentinelSecure™ is Simple.

For the most part, you or your systems admin just needs to:

1. Log in to the SentinelSecure™ dashboard, then
2. Go to the wizard in SentinelSecure™ and in a few clicks, your users are automatically added.

The simplicity of SyncDog's built-in wizard will have you up and running with SentinelSecure™ in just a few clicks. You owe it to yourself to see how our SentinelSecure™ C2 Workspace empowers your team in application functionality and ease of deployment. For a free trial of SentinelSecure™, please visit [www.SyncDog.com/trial/](http://www.SyncDog.com/trial/).
