

The SentinelSecure™ Mobile C2 Workspace

MobileIron Build: Empower Your Workforce with Greater Enterprise Application Functionality at Mobile Endpoints

For more than a decade mobile employees have been working with one hand tied behind their backs, with restricted abilities to easily and effectively collaborate with the corporate office, with peers, with partners, and with customers. When mobile collaboration is restricted, productivity and efficiency take a hit—and so does the bottom line.

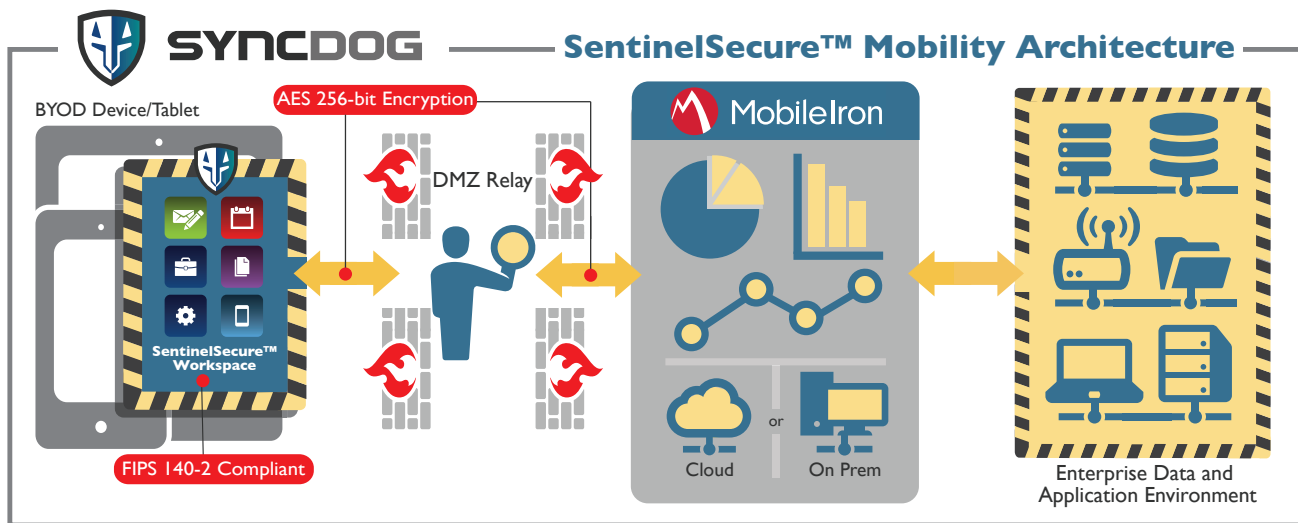

The SentinelSecure™ C2 Workspace (containerized & collaborative) removes that limitation, enabling unrestricted, unimpeded, and totally secure collaboration between mobile employees and their enterprise ecosystem. The C2 Workspace is protected through FIPS 140-2 compliance and AES 256-bit encryption.

A full suite of mobile-enabled productivity applications is available in the C2 Workspace:

- **Secure Enterprise Communications:** Email Client, Email Contacts, Calendar
- **Secure Enterprise File Management:** Briefcase, File Sync, DropBox, File Manager, Office Suite, Annotate, Secure Camera/Image Roll, SharePoint
- **Secure Internet/Intranet:** Secure Browser, HTML 5 Hybrid Mobile App Frameworks, Enterprise IM, Secure Chat
- **Secure Location-based Services:** Geo-location, GPS Tracking, Geo-fencing, Maps

SentinelSecure™ offers flexible pricing options from a leading ISV and can be procured through both direct and partner channels, including the MobileIron MarketPlace. For pricing information, contact us at SyncDog.com or find us in MobileIron's MarketPlace at MarketPlace.MobileIron.com.

The SentinelSecure™ mobility architecture consists of a remote mobile containerized & collaborative workspace integrated with an Enterprise Mobility Management or EMM system. SentinelSecure™ provides support for derived credentials and recovery keys.

SyncDog SentinelSecure™ Integration

SentinelSecure™ ships with integration to a multitude of Enterprise Mobility Management (EMM) systems. With SentinelSecure™, you get a defense-grade containerized workspace that serves as a complementary layer of security to your existing InfoSec investment. Your mobile app workspace is fully integrated into your EMM/MDM and your network perimeter remains secure.

SentinelSecure™ is currently integrated with the following EMM solutions: MobileIron, Notify Technology, Inc., and Snow Software. For more info on integration please visit SyncDog.com.

How easy is SentinelSecure™ to Provision?

For the most part, you or your systems admin just needs to:

1. Log in to the SentinelSecure™ dashboard, then
2. Go to the wizard in SentinelSecure™ and in a few clicks your users are automatically added.

The simplicity of SyncDog's built-in wizard will have you up and running with SentinelSecure™ in just a few clicks. You owe it to yourself to see how our SentinelSecure™ C2 Workspace empowers your team in application functionality and ease of deployment. For a free trial of SentinelSecure™, please visit www.syncdog.com/trial/.

Visit SyncDog.com/migration for more information.
