

MessageSolution Cloud Archive & eDiscovery for Microsoft Office 365

Offering Cloud and On-Premise Advanced Content Archiving & eDiscovery Services

The MessageSolution Cloud Archive & eDiscovery Platform provides a comprehensive and feature-rich online service for Office 365 and other environments. With all-inclusive functions, more content archiving and eDiscovery capabilities are available for tailored industry needs. MessageSolution delivers its unique Failsafe 365™ methodology for Office 365 to guarantee continuous local data access, advanced cost-effective eDiscovery solutions, and ensure data sovereignty.

In the event of sudden or planned downtime, MessageSolution provides uninterrupted access to live and historic mail for peace of mind. MessageSolution delivers protection for data with Failsafe archive availability through email continuity, anywhere and anytime. Failsafe 365™ adds an additional layer of protection by securing multiple copies instead of storing data with one provider, such as Office 365 archive. Immediate access to replicated copies of historic mail is available through MessageSolution stores and backs up for pressing instances during litigation. When Office 365 has an outage, MessageSolution's continuity will guarantee fool-proof and seamless accessibility to emails and maintain support for advanced search and eDiscovery capabilities.

MessageSolution Provides Extended Retention Options for Office 365
