

Tixeo launches its new secure Videoconferencing Android app

Tixeo, a European software company specialized in secure video conferencing, launches its new mobile app designed to host or attend meetings from any Android smartphone or tablet. Tixeo provides the first professional secure videoconferencing mobile app that guarantees a high level of confidentiality in meetings for nomad employees.

This app is designed for the uses and needs of mobile users concerned with the security of their meetings.

The whole Tixeo universe on Android

The app provides a clear and user-friendly interface keeping in line with the Tixeo universe. The user will have the full set of Tixeo's rich features and innovations in an Android environment: high quality audio and video with the exclusive "SVC on Demand" technology that adapts the streams to the network (3G/4G/Wi-Fi), screen sharing, secure chat. He also benefits from Tixeo global connectivity (interoperability with legacy H.323 / SIP video conferencing systems and telephone network).

The safe mobility

By releasing this app, Tixeo confirms its willingness to ensure security and confidentiality adapted to mobility. The Android app has the same security mechanisms as the macOS and Windows solutions (certified and qualified by ANSSI) developed by the Tixeo team, such a real end-to-end encryption, link encryption or not needing to open any network port.

The Tixeo Android app **is free to download on Google Play**

About Tixeo

Tixeo has been designing secure video conferencing solutions for more than 10 years. The design and development of its software are exclusively made in Europe. The Tixeo solution allows to meet in HD video conferencing from any equipment, while offering advanced collaboration features. Safety is taken into account at all stages of the conception (Secure by design). It is available as a Cloud service, an on-premise server or outsourced (TixeoCloud, TixeoServer or TixeoPrivateCloud). The H.323 / SIP TixeoGateway service enriches these offers. For those wishing to equip new rooms, prefer TixeoRoom to a proprietary solution. It will integrate naturally into the secured infrastructure, while reducing installation and administration costs.

Customers worldwide from SMB to large corporation trust Tixeo: Nexter, DCI, Eurengo, DGA (the French Defense Procurement Agency), DGAC (French Civil Aviation Authority), CNRS (French national center for scientific research), universities and training centers. Tixeo's technology is certified (CSPN) and qualified (Elementary qualification) by the National Cybersecurity Agency of France (ANSSI).

Tixeo is recognized for the quality, ease-of-use and security of its solutions.
