FOR IMMEDIATE RELEASE

RE-GRIP AND ISN ENTER DISTRIBUTION PARTNERSHIP

COAL CITY, Ill., June 26, 2017 — Re-Grip® and Integrated Supply Network (ISN) have recently entered into a distribution partnership.

Re-Grip is the simple, affordable way to add a new grip to any handle, lever, or tool within seconds and with no mess. The patented Re-Grip significantly improves upon existing options in the market.

ISN was founded in 1984 and is the nation's largest independent automotive tool & equipment specialist, serving wholesalers and distributors throughout North America and the United Kingdom.

ISN took note of Re-Grip, due to its ease of use and wide range of applications. Anyone can use it. Simply place the cylinder over a handle and then pull the tab at the bottom to unwind the coil. As the coil unravels, the elastic grip constricts and tightly conforms to the shape of the handle.

Re-Grip is comfortable, affordable, and manufactured with UV technology that allows it to stand up to nature's extreme elements. In addition, Re-Grip's non-slip safety properties and ergonomic design make it a perfect solution for every household, factory, construction site, automotive facility and manufacturing plant in the world.

Consumers aren't the only ones to take notice of Re-Grip's innovative design and wide range of uses. The product has won many awards, including the Edison Awards and National Hardware Show Retailer's Choice Awards. Re-Grip was also a finalist in the Home Shopping Network and Good Housekeeping Magazine's American Dreams initiative.

ABOUT RE-GRIP®:

Re-Grip® is a division of Preval, a wholly owned subsidiary of Chicago Aerosol.
