

## **iPatientCare sets forth to actively participate in American Academy of Pediatrics (AAP) exhibition to demonstrate Pro-Pediatrics capabilities of its Products and Services**

### ***iPatientCare to exhibit its Pediatrics EHR, RCM, and MACRA/PCMH solutions at AAP conference in Chicago***

**Woodbridge NJ, August 16, 2017** - iPatientCare, being a pioneer in cloud-based ambulatory EHR and **Revenue Cycle Management services**, announces its readiness to participate and exhibit into the AAP (American Academy of Pediatrics) Experience National Conference & Exhibition on September 16 through 19, 2017 in Chicago, to enlighten the revenue enhancements with **Pediatric EHR** and MACRA/PCMH solutions.

The principal objective of iPatientCare is enhancing the revenue cycle for Pediatricians and their medical practices. This is done through **MACRA/MIPS** and PCMH pre-validated EHR and back-office billing services. Numerous Pediatric practices have been using iPatientCare technology and value-added services for achieving Meaningful Use and PCMH Level-3 Certification for more than 10 years.

The AAP Experience National Conference & Exhibition will be organized from September 16 through 19, 2017 in Chicago. There has been a great deal of confusion in many Pediatric offices, as CMS has recently been changing its regulations quite frequently. In this conference, **iPatientCare** will step in and guide the providers on MACRA/MIPS & APMs, and on how to gain revenues for their practices.

“AAP Conference has always catered the best platform to demonstrate the innovative and outstanding health IT products/services, offering the highest networking opportunities to connect with industry leaders and other health IT professionals.”, said Udayan Mandavia, CEO/President, iPatientCare. He further added, “Many pediatricians are utilizing the technology and value added services of iPatientCare for a couple of years, and thus were easily able to achieve Meaningful Use and PCMH Level-3 Certification. This year at AAP Conference 2017, we are ready to enlighten our MACRA/MIPS and PCMH pre-validated EHR and back-office billing services and help all the visitors to understand how we can contribute to enhance the revenue cycle of the Pediatricians.”

iPatientCare looks forward to meeting influencing leaders, other innovators and attendees from across the globe at booth# 293, at AAP Conference from September 16-19, 2017. There, it is not just going to be serious lectures. We have also arranged for some entertainment like “Wheel of Fortune” game and some exciting gifts; so that, at the same time, our booth visitors can learn about enhancing their revenue cycle with MACRA/PCMH-ready **Pediatric EHR** and enjoy the time spent with us.

iPatientCare looks forward to meeting you at **booth #293** on the exhibit floor.

## About iPatientCare:

iPatientCare, Inc. is a privately held medical informatics company based at Woodbridge, New Jersey. The company's unified product suite includes ONC Certified Electronic Health/Medical Record and integrated **Practice Management/Billing System**, Patient Portal/PHR, Health Information Exchange (HIE), and Mobile Point-of-Care Solutions for both Ambulatory and Acute/Sub-acute market segments. iPatientCare has been recognized as a preferred MU partner by numerous Regional Extension Centers (REC), hospitals/health systems, and professional academies.

iPatientCare is also known for its Revenue Cycle Enhancement services that provides domestically outsourced, technology-enabled and process-driven solutions for patient access, denials management, HIM/billing and coding, and Lean Six Sigma dashboard-based analytics. iPatientCare has been helping healthcare providers dramatically reduce A/R days and improve collections rates, reduce billing costs, eliminate the burden of repeatable, high volume work on their internal teams, and plug gaps in staffing and internal bandwidth.
