

# HIPAA Security Risk Assessments for Healthcare Providers

## Internal Security Risk Assessment

An **Internal Risk Assessment** by HIPAA Solutions, LC focuses on employee and customer access to systems containing ePHI connected to the Local Area Network ( LAN) . The audit includes a *Minimum Necessary Use* analysis, and provides recommendations and remediation strategies that can assist in preventing breaches and data loss.

### A Summary of Audit Tasks Include:

- Analysis on the ability of the LAN to inhibit threats from gaining access to internal systems containing ePHI via improper Internet access and corporate email use,
- Analysis on undocumented users ability to gain remote access to systems storing ePHI,
- Evaluation on workstation security configurations related to the level of access applications expose a given operating system,
- Evaluation of wireless networks related to the ability of unknown users to gain access to the network; guest networks are evaluated related to undocumented access to the LAN,

### Breach Risk Assessment Services

- Breach containment and identification of options for immediate recovery, including an assessment of the breach

If you need help with HIPAA compliance, contact HIPAA Solutions, LC today to learn about the cost.
