## FOR IMMEDIATE RELEASE

## Atmosera Brings Enterprise-Class Security and Compliance to all Companies Doing Business in the Cloud

### *Atmosera offers flexible IT security and compliance solutions to combat the world's most sophisticated threats*

**PORTLAND, OR – August 29, 2017 –** Atmosera, a premier Tier-I Microsoft Cloud Solution Provider (CSP), today announced the expansion of its managed information security (InfoSec) and compliance solutions. Atmosera delivers enterprise-level solutions to companies of all sizes, ensuring they are protected against the rise of increasingly sophisticated security threats. The solutions address the business challenge of balancing better security with flexibility, while ensuring both internal and regulatory compliance.

"Growth in worldwide cloud-based security services will remain strong, reaching $5.9 billion in 2017, up 21 percent from 2016, according to Gartner, Inc. Overall growth in the cloud-based security services market is above that of the total information security market. Gartner estimates the cloud-based security services market will reach close to $9 billion by 2020."[1]

Atmosera provides a structured approach to each customer engagement - clearly identifying potential risks and how best to mitigate them. Each solution carefully takes into consideration the end-to-end architecture encompassing end-points, applications, and people. Under its portfolio of InfoSec and compliance services, Atmosera offers the following:

▸ Guidance with up to eight hours of consultative support and one audit per year
  ▸ Architecture design to meet security and compliance requirements
  ▸ Responsibility matrix that clearly outlines what the customer and Atmosera are responsible for across the entire solution
▸ Logical and physical separation with security of data stored in the cloud
  ▸ Dedicated hardware or multi-tenant options
  ▸ Military-grade data encryption for sensitive data

---

- Advanced host and network configuration
  - Hardening operating system and service configurations
  - State of the art firewall management with IPSEC VPN access to environments
- Security monitoring
  - Network security detection and prevention
  - Critical file changes on all hosts
  - Host-level security event monitoring
- Log event management to collect and correlate multiple log sources
- Vulnerability identification and remediation
  - Network vulnerability scanning
  - Network penetration testing

Atmosera has more than a decade of experience securing hosting and cloud customer environments. The company supports organizations that include CarePayment, Consonus Healthcare Services, Sole Financial, Vistalogic, and Wellsource who selected Atmosera for the cloud solution provider's ability to right size security for their operations. Atmosera's expertise comes from the ability to offer flexible InfoSec and compliance frameworks that best meet the unique demands of each customer.

"Proper IT Security is a business imperative to help protect our customer's information and our company's reputation," said Dawn Koenninger, Vice President of Finance at SOLE Financial. "Staying abreast of all the threats and means to counter them requires a partner who can be trusted as an extension of our team. Atmosera has been instrumental in helping us stay compliant with industry standards and is counted on to manage our environment day-in and day-out."

"This is an exciting time for companies and how they can leverage technology to conduct business anywhere in the world and on any device," said Ray Espinoza, Vice President of Information Security & Chief Information Security Officer (CISO), Atmosera. "Having worked for eBay, Workday, and Cisco Systems, I have a deep appreciation for what enterprise-level security means and how to deliver that level of sophistication to all our customers. Our services are evolving rapidly to stay on top of the threat landscape and ensure our customers have the best possible solution."
