For Immediate Release:

## Janco International adds Tire Registration Plus to their StockTrac shop management system.

**BRIGHTON, Mich. (DATE)** - Tiremetrix, LLC today announced that its Tire Registration Plus Software is now offered through an integration with Janco International's Shop Management System, StockTrac.

"We are excited to announce the integration of Tire Registration Plus within our StockTrac Point of Sale software," said Linda Wittbrodt, Executive Vice President of Janco International. "Tiremetrix built an extremely useful solution that helps our dealers register tires directly with the manufacturer, validate DOT numbers and check for recalls, all in one easy step. Tire registration laws are changing and Tire Registration Plus helps our dealers comply with the FAST Act, while providing their customers peace of mind that their new tires are registered properly and that they will be contacted in the event of a recall."

"We believe that our products will be a tremendous value to StockTrac users," said Joe Donehue, President of Tiremetrix. "Advancing automotive technology and regulatory requirements will continue to challenge tire dealers and independent service providers. Our software products are designed to help overcome these challenges, allowing dealers to focus on servicing cars and selling products. The shared goal is greater efficiency, profitability and reduced liability."

Tire Registration Plus is the industry's most advanced electronic Tire Registration Software, helping tire dealers validate DOT numbers and transmit records directly to the appropriate manufacture.

About Tiremetrix, LLC:

Tiremetrix, LLC is a privately-owned Michigan based automotive information Software Company. TPMS Manager and Tire Registration Plus are software-as-a-service products created by Tiremetrix and used by tire dealers and automotive service centers throughout North America.
