

ALLUMERA®

The Brilliance of Beautiful Skin

Bellus Medical introduces **Allumera**, a light-activated photodynamic cosmetic cream that fits seamlessly into any aesthetic practice as a non-invasive solution.

Allumera has been clinically proven to:*

- Minimize the appearance of pores
- Revitalize skin for a younger looking, clearer complexion
- Reduce the appearance of fine lines and crow's feet
- Improve skin firmness, creating a more supple appearance
- Improve overall skin texture

Additionally, patients experienced a **44% reduction** in the appearance of pores three months after their third procedure

*Data on file: RevitAll study, a safety & efficacy study of Allumera® and skin illumination in 101 subjects

“As a patient advocate, I am continuously involved in research and development. Allumera is a great addition for any practice looking to enhance the results of their light-based therapies, offering patients a non-invasive option with little to no downtime.”

- Dr. Todd E. Schlesinger, Board Certified Dermatologist, Dermasurgeon and Cosmetic Dermatologist, South Carolina

In a survey conducted three months after patients' third **Allumera** procedure:*

- **93%** of people said their skin felt softer.
- **91%** of people said their skin felt more hydrated, moisturized and smoother.
- **89%** of people said their skin texture was improved.
- **86%** of people said their skin looked and felt healthier.
- **73%** of subjects saw a reduction in wrinkles.
