

NATIONSLINK

NVS is proud to offer NATIONSLINK

A Desktop Appraisal with Inspection

Fast, inexpensive and compliant, the proprietary product combines either an exterior only or interior/exterior inspection with a USPAP compliant Desktop Appraisal Report.

NATIONSLINK provides an inexpensive solution to the high expense and long delays for a traditional field appraisal.

NATIONSLINK reduces valuation risk with an appraiser's value opinion supported by a physical inspection. The appraisal is completed by a licensed or certified appraiser who utilizes recognized methods and techniques. The appraiser has geographic competence and incorporates real time local MLS data in their analysis.

NATIONSLINK meets regulatory requirements for low risk independent valuation analysis that is substantially more accurate and meaningful than AVMs or BPOs.

NATIONSLINK provides lenders with an ideal valuation solution for home equity loans, portfolio analysis or pre-foreclosure scenarios, where a full appraisal is not required by law.

Contact NVS to learn more about speed, accuracy and compliance of **NATIONSLINK**.
