

AUTOMATICALLY VALIDATE ADDRESSES

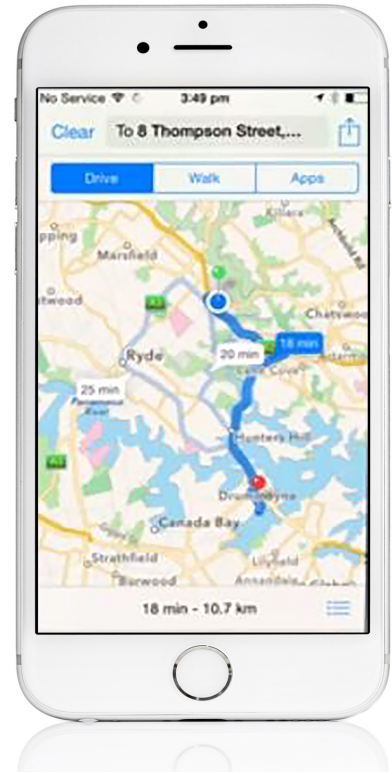

Starting at intake and cascading throughout the system, you have the opportunity to validate client addresses to ensure that the team in the field arrive at the correct location. If an address cannot be validated, Best Route provides a suggested address as well as a visual indicator of which part of the address could not be validated, so that data entry mistakes are eliminated at the source. In areas that are not mapped well, typically rural locations, Best Route offers the opportunity to move the mapping pin to the correct address location for accurate directions and mileage calculations.

OPTIMIZE YOUR SCHEDULING

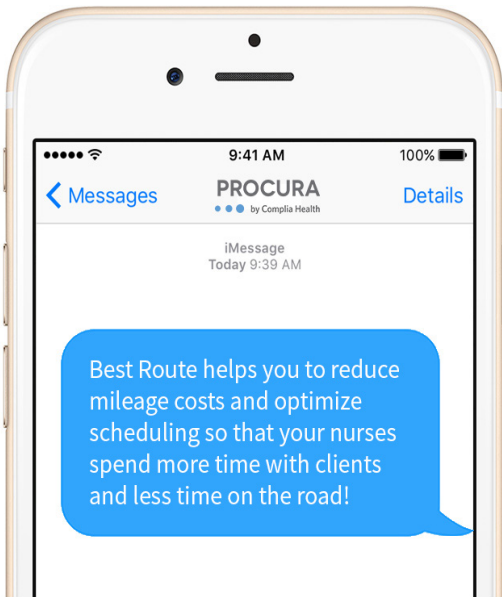

Best Route offers front-end decision support to your schedulers by providing them with the chance to review an employee's schedule for the day and then reorder the visits based on the fastest route, the shortest route or most optimized route to reduce both mileage and the time your employees spend on the road. Those visits that need to be performed at a specific time are flagged and the route can be optimized around them.

AUTOMATE MILEAGE ENTRY

On completion of service delivery, verified visit mileage calculations are automatically completed, dramatically reducing data entry and improve the accuracy of your reports. The mileage data is available throughout your organization and can be fed directly into the payroll system for immediate disbursement. If mileage continues to be self-reported, you are able to compare and contrast the mileage reported with Best Route suggested to identify areas for improvement.

SPEND LESS TIME ON THE ROAD

HERE'S WHAT BEST ROUTE CAN DO FOR YOU:

- Reduce mileage expenses by improving the accuracy of mileage calculations.
- Increase your clinician's capacity by removing manual data entry of visit-to-visit mileage records, validating patient addresses and suggesting routes with the least amount of on the road time.
- Eliminate manual administration and QA of mileage.
- Enable performance management by identifying variances from agency processes and policies.
- Documents mileage to the visit for improved reporting.
- Feed directly into payroll so that mileage disbursements are paid out every pay period.
