

Kombucha Home-Brewing Product Set to Disrupt The Industry Reaches Funding Goal in 48 Hours

Thea Kombucha's [Kickstarter campaign](#) exceeds its funding goal in less than 48 hours for its new home-brewing product, [Kombucha Starter Seed™](#), The Easiest Way to Make Real Kombucha at Home™.

The company's innovative product is revolutionizing the way kombucha lovers can make the all-natural fermented tea at home. The *Kombucha Starter Seed™* is a first of its kind dry blend of yeast and probiotics necessary to transform up to one gallon of regular tea and sugar into real home-made kombucha in 7-10 days.

The quick-activating formula is 100% natural and made without any synthetic ingredients. The unique process used to create the Kombucha Starter Seed™ allows the product to have a long shelf-life to make it accessible to consumers in supermarket shelves and natural product stores.

About Thea Kombucha Company

Thea Kombucha Company, LLC. is a Denver, Colorado based company founded in 2017 to manufacture and commercialize a dry yeast & probiotics formula for kombucha home-brewers. For pictures and to download the official video, please view our [Press Kit](#) or visit www.theakombucha.com.
